

Aryan Sindhu

Los Angeles, CA | (213) 803-9447 | ariansin@usc.edu | <https://linkedin.com/in/aryansindhu> | <https://github.com/aryansindhu8>

EDUCATION

- **University of Southern California** Los Angeles, CA
Master of Science in Computer Science Aug 2025 – May 2027
- **Chitkara University Institute of Engineering & Technology** Punjab, India
Bachelor of Engineering in Computer Science & Engineering | Merit Scholar, Top 5% of Cohort Aug 2020 – May 2024

EXPERIENCE

- **University of Southern California** Los Angeles, CA
Course Grader – CSCI 599: Agentic AI & CSCI 526: Advanced Mobile Devices & Game Consoles Aug 2026 – Present
 - **Evaluate technical assignments and capstone projects for 250+ students** across Agentic AI and game development courses, assessing implementation correctness, code quality, system design, and project execution across **LLM agents, multi-agent systems, RAG, REST APIs, and Unity-based applications**.
 - **Support 250+ students and course operations** by resolving technical questions via **Piazza and Discord**, validating lecture demos, assisting in-class activities and project presentations, and collaborating with faculty on grading and course operations.
- **Infoaccords Technologies** Chandigarh, India
Software Engineering Intern Aug 2023 – Aug 2024
 - **Architected and delivered 5+ production-grade full-stack features** for **Ministry of POS**, enabling nationwide online sales and **accelerating product releases by 30%** by partnering with the **CEO** to translate business requirements into scalable solutions using **React.js, Node.js, Express.js, PostgreSQL, MongoDB, Stripe, AWS, and REST APIs**.
 - **Engineered responsive React interfaces supporting high-volume product catalogs, reducing page load time by 40%** through lazy loading, component optimization, efficient API integration, database indexing, and cloud deployment optimization.
- **Citadel India Tech** Haryana, India
Software Engineering Intern Dec 2022 – Jun 2023
 - **Architected and optimized scalable RESTful services supporting enterprise workflows, reducing API latency by 30%** through efficient SQL query optimization, modular backend architecture, and Python-based automation.
 - **Improved production reliability by reducing software defects by 35%** through automated testing, systematic debugging, peer code reviews, and versatile cross-functional collaboration while delivering production-ready full-stack software.

KEY PROJECTS

- **ArtSphere**  Feb 2026 – May 2026
Node.js, Express.js, Bootstrap 5, Leaflet.js, Google Cloud Run, REST APIs, Docker
 - **Reduced API integration complexity by 50%** by architecting scalable **Node.js/Express** proxy services unifying 2 museum APIs (Met Museum and Harvard Art Museums) with pagination, normalization, and secure configuration.
 - **Reduced repeat search time by 70%** by implementing persistent favorites using browser **localStorage**, responsive UI with **Bootstrap 5**, interactive **Leaflet.js** maps, and cloud deployment on **Google Cloud Run**.
- **CineScope**  Oct 2025 – Jan 2026
Python, Flask, TMDb API, YouTube Data API, Google Cloud Run, Docker, HTML, CSS, JavaScript
 - **Eliminated backend credential exposure** by implementing secure **Flask** services with environment-based configuration while integrating TMDb and YouTube APIs.
 - **Improved application responsiveness by 40%** through asynchronous API communication, dynamic frontend rendering, Docker containerization, and deployment on **Google Cloud Run**.
- **DentalEdge**  Jan 2024 – May 2024
MongoDB, Express.js, React.js, Node.js, Passport.js, REST APIs, Razorpay
 - **Improved backend scalability and security** by implementing **Passport.js** authentication, optimized **MongoDB** schemas, and scalable **Node.js/Express** REST APIs for healthcare workflows.
 - **Accelerated project delivery by 25%** through leadership of backend development for a 3-member capstone team, optimizing database performance, and integrating **Razorpay** payments.

PUBLICATIONS

- **Co-Author – Empowering Rural Farmers with AI: Overcoming Global Challenges**  Oct 2024
Artificial Intelligence, Precision Agriculture, Technical Research
 - **Co-authored a peer-reviewed AI publication demonstrating 15% productivity improvement** by synthesizing **10+ AI, ML, and IoT studies** and analyzing data from **600 survey participants** to support the technical methodology and experimental analysis.

SKILLS

- **Programming Languages:** Java, Python, C++, JavaScript (ES6+), SQL, HTML5, CSS3
- **Frameworks & Technologies:** React.js, Node.js, Express.js, Flask, Bootstrap 5, REST APIs, MERN Stack
- **Databases, Cloud & Tools:** PostgreSQL, MongoDB, MySQL, AWS, Google Cloud Run, Docker, Git, GitHub, Postman
- **Software Engineering:** Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, Computer Networks, System Design, Full-Stack Development, API Development, Software Architecture, Distributed Systems, Unit Testing, Debugging, Agile/Scrum, Information Retrieval and Web Search Engines, Web Technologies

ACHIEVEMENTS

- **Certifications:** Meta Full Stack Developer Professional Certificate (in progress; completed: Front-End Development, Programming with JavaScript, Version Control, HTML and CSS in Depth)
